## Why should you choose Icon LASIK?

### TWO DECADES OF EYE CARE EXPERIENCE.

Icon LASIK® has performed more than 60,000 LASIK/PRK procedures and has been providing eye care in Colorado for over 20 years. Through this extensive experience and highly regarded safety record, our Icon LASIK professionals have successfully renewed each patient's vision based on their individual situation and prescription.

### USING THE LATEST IN ADVANCED TECHNOLOGY.

Our team at Icon LASIK continues to invest in the most cutting edge technology such as the NIDEK EC-5000 Tracking Laser, the VISX Star 3 Tracking Laser, and the VISX Wavefront Laser. Icon LASIK professionals also utilize the Moni micro keratome. And to ensure we have properly screened your eyes prior to a LASIK procedure, Icon LASIK uses the Orbscan cornea topography system, which measures your cornea curvature and thickness. In addition, we can also provide digital photos of the retina.

### COMBINING QUALITY AND AFFORDABILITY.

Icon LASIK is proud to be the first provider in Colorado to make LASIK affordable. With Icon LASIK prices starting as low as \$499, along with financing options for nearly everyone, you would be surprised how our LASIK procedures can accommodate every individual budget. Our goal is to keep LASIK affordable by

- Using a more efficient business model that never includes paying co-management fees to third party eye doctors (co-management is when doctors receive commission for sending potential patients to certain LASIK centers which means you pay more)

- Having our own on-site laser systems, so we do not have to rent lasers to perform procedures. This makes Icon LASIK more affordable and allows us to perform more LASIK procedures than any other clinic in Denver.
- Receiving more and more patient referrals from our current clientele who easily convince their friends and family to choose Icon LASIK. These referrals allow us to spend less money on advertising our services, so you always pay less for LASIK from us.

### FREE CUSTOMIZED INITIAL CONSULTATION.

Using state-of-the-art machinery and the expertise of our eye doctors, Icon LASIK will provide you with a free, thorough, LASIK consultation to determine if you are an ideal candidate for a LASIK procedure.

### CUSTOMIZED TREATMENTS FOR EACH EYE.

Icon LASIK realizes that each of your eyes is unique, so both eyes will receive a custom laser treatment. It is also common for our team to treat one eye with two distinct lasers to maximize the benefits of each laser.

### PERSONALIZED PRE- AND POST-OP CARE.

Since every eye is one-of-a-kind, our care for your renewed vision does not stop when your LASIK surgery is complete. If you need extra post-op care, the Icon LASIK team will always be available to assist you with our eye doctors on call 7 days a week, 24 hours a day.

### FREE LASIK ENHANCEMENTS FOR LIFE.

When you are enrolled in the Icon LASIK Lifetime Enhancement Program, you will receive free LASIK enhancements for life. And, you will have peace of mind knowing that you truly invested in your vision's future.

Call today  
to schedule your  
FREE LASIK consultation.

**PROFESSIONAL** The Landing Page will link here when the customer clicks on "Looking for Marine Plywood". Since both professional and amateurs will be using the same page, we can show finished products from both pros and amateurs.

**AMATEUR** These subheads will just reinforce that both types of customers are welcome. Market specific information can be included in both areas. Include any important information that the current site is lacking.

**AQUATEK MARINE PLY 48"x96" / AQUATEK MARINE PLY 48"x96"**

Aquatek is also a tan based marine grade plywood. This cost-effective marine panel is taking over the Douglas fir A/B marine market by steam. Offering few to no core voids, more plies, and a competitive price, Aquatek is popping up in numerous applications. Garage doors, decking, outdoor applications and boat building, we're just starting to scratch the surface of applications for this product. Listed price is for 8mm. Different sizes are available.

[Details](#) | [Register or Login for Retail and Wholesale Prices](#)

---

**HYDROTEK BS1088 PLY 48"x96"**

Hydrotek is also a tan based, multi ply, marine grade plywood that is manufactured in accordance with the British Standard 1096 for marine craft. The actual species is Red Shouka. This panel offers some savings over the Joubert Okoume, but is a tan based product and therefore heavier and does not carry Lloyd's of London certification. Listed price is for 8mm. Additional sizes are available.

[Details](#) | [Register or Login for Retail and Wholesale Prices](#)

---

**JOUBERT OKOUME BS1088 MARINE PLYWOOD 48"x96"**

Joubert Okoume is the highest quality marine plywood available today. Joubert Okoume is certified by the Lloyd's of London to be manufactured to the British Standard 1096. This lightweight panel is used almost exclusively for marine applications. The type of customers who typically purchase the BS1088 Okoume can vary from the hobbyist boat/market builder to the legend boat manufacturer in the world. Listed price is for 8mm. Additional sizes are available.

- Expert Instruction
- Highest Quality Driver Education

We teach people to drive

## How important is driver education?

Take any 16-year old driver and they're 20 times more likely to have a motor vehicle crash than any other licensed driver.\*

**Consider some of the facts:**

- 83% are caused by driver error
- 73% are single vehicle crashes
- 47% of all first year drivers are involved in a crash
- 22 teenagers die every day in vehicle crashes

These numbers make it hard to believe that driver education programs are not focused on investing in quality training. So what remains are lecture-based instruction methods that fail to encourage safe, lasting driving habits.

**Now, it's time for you to explore the Top Driver difference.**

**Are you wondering about Microdermabrasion?**

**What is Microdermabrasion?**  
Microdermabrasion is an alternative to chemical peels or erbium laser resurfacing. It combines a spray of fine, abrasive crystals with highly controlled vacuum and pressure. These combined actions remove the dead epidermal layer correcting many superficial skin imperfections, stimulating collagen production and creating a more youthful appearance.

**Is Microdermabrasion Safe?**  
Aluminum oxide, which is the material of which the fine, abrasive crystals are made, is the third most abundant element on earth. There is no risk of allergic reaction. The crystals used in the microdermabrasion machine are 99% pure and are non-toxic if ingested.

**What should I expect After a treatment?**  
The treatment takes approximately 30-45 minutes. The patient's skin may be red following treatment, and some redness may linger for 1-3 days. Peeling may begin and continue for 3-7 days, but it does not always occur and is not an indication of effective treatment. Patients will be individually advised how to care for their skin post-treatment.

**How many treatments are Recommended?**  
Every individual is unique and has special needs. Most patients require a series of 6-12 treatments. Upon completion of that series, maintenance treatments every 4-8 weeks are recommended to keep skin feeling soft and smooth and younger looking.

**Special Rate Packages**  
Single Treatment = \$80.00  
Package of 5 Treatments = \$400.00 + get 6th FREE  
Package of 10 Treatments = \$720.00

To schedule an appointment, call 1.720.524.1001 or visit [www.icondenver.com](http://www.icondenver.com)
